DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 5 and 6, filed 25 June 2007, with respect to independent claim 1 (and applicable to new claim 22) have been fully considered and are persuasive. The previous rejection of the claim has been withdrawn.

Allowable Subject Matter

2. Claims 1-3, 8-10 and 22-26 are allowed over the Prior Art of record.

3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of independent claims 1 and 22 are the inclusion of the limitations of an analytical apparatus arranged to carry out automatically a plurality of analytical steps during *thermal desorption* (emphasis added) of a sample having a plurality of sampling tubes in an autosampler, and a release device for releasing a sample, an *analyzer for analyzing a first portion of the released sample* (emphasis added) and a *re-collection device* (or a *re-release device*) for collecting (or re-releasing) *a second portion of the released sample* (emphasis added) along with the remaining limitations recited in the claim. None of the Prior Art teach the above emphasized limitations in combination with the other recited elements in an analytical/analyzing device handling samples to be analyzed. The closest reasonable Prior Art reference is US 2003/0067393 to Albro et al. which disclose an automatic sampling analytical device handling a sample, however, does not teach the specific limitations recited in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
